

YOUSSEF SHERIF RAMADAN

Data Analyst | Business Intelligence & AI/Machine Learning

Giza, Egypt | +20 01115843771 | yshreef924@gmail.com | [linkedin.com/in/youssefsherif](https://www.linkedin.com/in/youssefsherif)

SUMMARY

Data Analyst with hands-on experience in data analysis, SQL, Power BI, and Excel, gained through a 9-month Applied AI & Data Analytics scholarship and independent portfolio projects. Skilled in writing complex SQL queries, building ETL/ELT pipelines, and designing Power BI and Excel dashboards and reports for KPI tracking and business decision-making. Experienced in data cleaning, data wrangling, exploratory data analysis (EDA), data modeling, and root cause analysis (RCA), with a strong record of turning raw data into clear, actionable business insights for stakeholders. Complements this analytical foundation with applied Artificial Intelligence and Machine Learning experience — predictive modeling, deep learning, model evaluation, and Generative AI/LLMs — for forward-looking, data-driven analytics. Biotechnology background contributes strong analytical rigor and structured problem-solving to every project.

CORE SKILLS

- **Data Analysis:** Data Analyst core toolkit — SQL, Power BI, Excel (Pivot Tables, VLOOKUP), Exploratory Data Analysis (EDA), Data Wrangling, Statistical Modeling, Root Cause Analysis (RCA), Data Modeling, Business Reporting, Hypothesis Testing, A/B Testing, Regression Analysis
- **SQL & Databases:** Complex SQL queries, joins, subqueries, views, stored procedures, database design, SQL Server, relational schema design
- **Data Engineering (ETL/ELT):** ETL/ELT pipeline design, data cleaning & preprocessing, data quality management, data pipelines
- **Data Visualization & BI:** Power BI (DAX, dashboard design), Excel dashboards, Tableau, Matplotlib, Seaborn, Streamlit, KPI Reporting & Tracking, Ad-Hoc Reporting, Business Intelligence (BI)
- **Artificial Intelligence & Machine Learning:** Supervised & Unsupervised Learning, Predictive Modeling, Deep Learning, Neural Networks, Clustering (K-Means), Feature Engineering, Model Evaluation & Optimization, Generative AI, LLMs, AI Applications
- **Programming:** Python (Pandas, NumPy, Scikit-learn), DAX, PySpark (familiar)
- **Tools & Platforms:** Git, Cloud Platforms (Azure, AWS familiarity), Meta Business Suite, Google Ads, Canva

PROFESSIONAL EXPERIENCE

Applied AI & Data Analytics Trainee

Dec 2025 – Present

Digilians Initiative — 9-Month Scholarship, Ministry of Communications and Information Technology (MCIT)

- Applied statistics and data analysis techniques using Python, SQL, and Excel to analyze large, multi-source datasets and identify trends, patterns, and anomalies.
- Built and evaluated predictive machine learning models, improving model accuracy through iterative feature engineering.
- Performed data mining, ETL-style data preparation, and structured SQL querying to extract actionable business insights and support Power BI/Excel-based KPI reporting.
- Analyzed web and social network data to support data-driven decision-making, translating raw data into clear, actionable insights for stakeholder reporting.
- Completed a Capstone Project solving a real-world analytics problem end-to-end, from data collection and data quality checks through insight delivery and presentation.

Senior Social Media Specialist

Feb 2025 – Oct 2025

Arcktech Marketing Agency

- Analyzed performance analytics and audience insights across 7 client accounts to optimize engagement and inform content strategy decisions.
- Built and maintained content calendars and reporting workflows using Meta Business Suite, Canva, and Buffer, improving publishing consistency across multiple platforms.
- Delivered data-backed strategy recommendations directly to clients based on monthly performance metrics.

Social Media Specialist

Mar 2024 – Dec 2024

Vook Marketing Agency

- Tracked and analyzed campaign performance metrics across multiple platforms to optimize content strategy and improve audience reach.
- Managed end-to-end social media strategy for multiple client accounts, aligning content output with measurable brand goals and KPIs.

Social Media Specialist

Jan 2023 – Feb 2024

Creative Digital Marketing

- Developed data-driven marketing strategies tailored to target demographics, using performance data to guide campaign decisions.
- Produced high-converting content that measurably boosted engagement rates and audience growth.

Customer Service Representative

Oct 2020 – Feb 2022

Concentrix

- Resolved inbound and outbound customer inquiries efficiently while maintaining high service quality standards.

DATA & AI PROJECTS

RetailPulse AI: Customer Segmentation Engine

Python · Scikit-learn · Pandas · Matplotlib · Streamlit

github.com/YoussefSherif218/Retail-Pulse-AI-Strategic-CustomerIntelligence

- Built an end-to-end ML pipeline on the UCI Online Retail II dataset (~1M rows) to segment customers into 4 business archetypes using K-Means clustering with RFM features; delivered a live Streamlit dashboard with per-segment strategic recommendations.
- Identified that the Champions cohort (10% of customers) drives 40–50% of total revenue, enabling targeted budget allocation for marketing spend.

Bank Marketing Analytics: Conversion Optimization

Python · Pandas · NumPy · Seaborn · SciPy

github.com/YoussefSherif218/Bank-Marketing-Analytics

- Performed comprehensive EDA and root cause analysis on 4,521 records across 17 features to identify key drivers of term deposit subscription in a highly imbalanced dataset (11.5% positive class).
- Discovered call duration as the strongest conversion predictor (553s vs. 226s, a 2.4x gap); produced 3 actionable campaign recommendations to reduce operational costs and lift conversion.

Corelytics: Body Performance Data Analysis & Classification

Python · SQL-style Data Analysis · Scikit-learn · XGBoost · SHAP · Pandas · Matplotlib/Seaborn

github.com/YoussefSherif218/Corelytics-Body-Performance

- Built and benchmarked 6 machine learning classification models (KNN, Decision Tree, SVM, MLP, XGBoost, Voting Ensemble) on 13,272 fitness records, engineering features via greedy forward selection.
- Achieved 89.0% accuracy (binary) and 77.5% (4-class) with XGBoost, confirmed statistically significant via paired t-tests ($p < 0.05$); applied SHAP for model explainability.

Transportation & Logistics Tracking: Data Analysis, SQL & Delay Prediction

SQL Server · ETL · Python · Scikit-learn · Orange Data Mining

github.com/YoussefSherif218/Transportation_and_Logistics_Tracking

- Conducted end-to-end EDA and root cause analysis on 6,880 GPS-tracked shipment records, and trained a Random Forest classifier achieving 88.9% accuracy in predicting delivery delays.
- Identified transportation distance and GPS provider reliability as the top delay predictors, informing a GPS-migration recommendation projected to cut delays by ~70%.
- Designed a normalized SQL Server database (11 tables, full ERD) for an e-commerce delivery system, built an ETL process to load data from CSV sources, and wrote 10 SQL business queries plus reporting views covering courier performance and revenue.

Retail SQL Lab: Data Analyst SQL Project — Online Retail II

SQL Server · SSMS · ETL · CSV/Excel Data Sources

github.com/YoussefSherif218/Retail-SQL-Lab

- Designed and implemented a 5-table relational schema (Country, Customer, Product, Invoice, InvoiceLine) in SQL Server for over 1 million retail transaction records, with full referential integrity via primary/foreign keys (data modeling).
- Built an ETL process to load raw CSV source files into SQL Server tables, handling delimiters, duplicate keys, and data type validation.
- Performed complete exploratory data analysis and root cause analysis using SQL — data quality checks, cancellation rate, returns, and revenue-by-country reporting — and surfaced two critical data anomalies (a -53,594 minimum price and a -80,995 minimum quantity) for data governance follow-up.
- Built a 6-view SQL analytical layer (clean invoice view, transaction-type tagging, and fact/dimension views) to support repeatable Power BI/Excel-ready sales reporting.

EDUCATION

Bachelor's Degree in Biotechnology

Sep 2019 – Jun 2023

Cairo University

CERTIFICATIONS & COURSES

- Microsoft Certified: Power BI Data Analyst Associate (PL-300) | July 2026
- Data Analyst in Python — DataCamp
- SQL — DataCamp
- Foundations: Data, Data, Everywhere — Google / Coursera
- Digital Marketing — HubSpot Academy
- Content Marketing — HubSpot Academy
- Microsoft Office — Ministry of Youth and Sports
